Add page numbers

To **number PDF pages**, upload your files from your [device](#) or from your [Google Drive or Dropbox](#) account.

Choose if you want to number all pages or just facing pages. Choose the page range to number. You can also edit the position of your number, and its format (typo, size color, opacity...) in the toolbar.

Then hit 'Add Page Numbers' button and download or save back to the cloud your numbered PDF. Check 'Page Numbers' [limits](#) for each account type.

Add watermark

To **watermark PDF files**, upload your PDF from your [device](#) or from your [Google Drive or Dropbox](#) account.

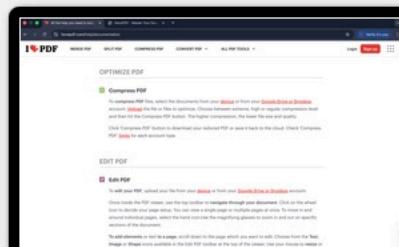

You can combine text and image in your watermark, which will be stamped in the same position in all the pages of your file. You can custom format, orientation and opacity.

Then hit 'Add watermark' button and download or save back to the cloud your watermarked PDF. Check 'Watermark' [limits](#) for each account type.

Repair PDF

To **repair a PDF**, upload your damaged or corrupt PDF file from your [device](#) or from your [Google Drive or Dropbox](#) account. Our tool will try to analyze, repair or recover content from your corrupt file.

Then hit 'Repair' button and download or save back to the cloud your repaired PDF. Check 'Repair PDF' [limits](#) for each account type.

OPTIMIZE PDF

Compress PDF

To compress PDF files, select the documents from your [device](#) or from your [Google Drive or Dropbox](#) account. [Upload](#) the file or files to optimize. Choose between extreme, high or regular compression level and then hit the Compress PDF button. The higher compression, the lower file size and quality.

Click 'Compress PDF' button to download your reduced PDF or save it back to the cloud. Check 'Compress PDF' [limits](#) for each account type.

EDIT PDF

Edit PDF

To edit your PDF, upload your file from your [device](#) or from your [Google Drive or Dropbox](#) account.

Once inside the PDF viewer, use the top toolbar to **navigate through your document**. Click on the wheel icon to decide your page setup. You can view a single page or multiple pages at once. To move in and around individual pages, select the hand icon. Use the magnifying glasses to zoom in and out on specific sections of the document.

To add elements or text to a page, scroll down to the page which you want to edit. Choose from the **Text**, **Image** or **Shape** icons available in the Edit PDF toolbar at the top of the viewer. Use your mouse to **resize** or **move** any element as you wish on the same page where it was created.

Remove Pages

To remove pages from one or multiple PDFs, upload your file from your [device](#) or download it from your cloud-connected accounts as [Google Drive or Dropbox](#). You can remove pages from password protected documents as well.

You will see a thumbnail of every page of your file. When uploading multiple files, the thumbnails of each file will be framed in a different color. You can click on each thumbnail to remove that page. After clicking, a red cross will appear over the thumbnail, showing that the page will be removed. Hit on Remove Pages button to download your processed PDF. Check 'Remove Pages' [limits](#) for each account type.

Extract Pages

To extract pages from a PDF file, upload your file from your [device](#) or from your cloud storage accounts as [Google Drive or Dropbox](#). You can remove pages from password protected documents too.

You will see a thumbnail of every page of your file. When uploading more than one file, the thumbnails of each file will be framed in a different color. Click on the pages you want to extract. Choose if you want to merge all the extracted pages into a new PDF or download it in a .zip folder. Then, hit the Extract Pages button. Check 'Extract Pages' [limits](#) for each account type.

Organize PDF

To organize the pages from a PDF file, upload your file from your [device](#) or download it straight from the cloud through your [Google Drive or Dropbox](#) account. You can remove pages from password protected documents as well.

Sign PDF

To sign your own document

Upload the document to our Sign PDF tool. **Sign**. Choose your preferred signature adoption from the sidebar menu to customize your signature. You can either draw your signature, upload an existing one or sign with text. You can add other fields to your signature such as date and initials. Download. Click the 'Sign PDF' button to download your signed PDF or save it back to the Cloud.

To collect e-Signatures

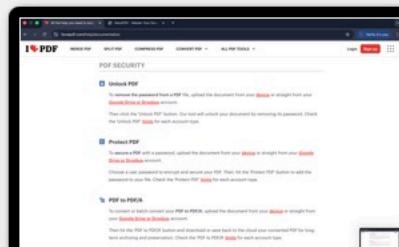

To create a signature request, upload the document to our Sign PDF tool. Once you have uploaded your PDF document, **create a signature request**. You will need to add signers, include signing fields, adjust security parameters, and then send. Sign. All signers will receive an email with access to the document, and they will be able to read it and sign it. **Download**. Once the signature process has been completed, you will receive a copy of the signed document along with the option to download an Audit trail. The Audit trail can be used as evidence in legal proceedings.

TECH CONCEPTS

Password-protected files

If you process a password-protected file, we will ask you to help us open it. Once it has been opened and processed, we commit to not storing this password on our servers.

TECH CONCEPTS

Password-protected files

If you process a password-protected file, we will ask you to help us open it. Once it has been opened and processed, we commit to not storing this password on our servers.

Rotating files

You can rotate your files by hovering the mouse over a file and clicking the () icon. But if you want to rotate more than 10 files at once, you can do so automatically in the pop-up window that will appear. Before you can do it, you will have to render all the pages to rotate them in the same direction.

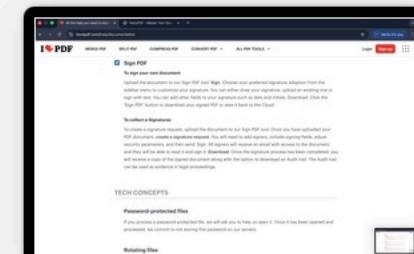

JPG to PDF rotation

Rotating an image in a PDF document only affects the image. Afterwards, you will be able to choose the page orientation (vertical or horizontal) with the newly rotated image.

Organizing files

Files can be organized in different ways. Drag and drop them however like; you can also arrange them alphabetically by clicking the () icon; and you also have the option of arranging them in inverse alphabetical order clicking the () icon.

Compressing files

Organizing files

Files can be organized in different ways. Drag and drop them however like; you can also arrange them alphabetically by clicking the () icon; and you also have the option of arranging them in inverse alphabetical order clicking the () icon.

Compressing files

After processing your files, you will see the original file size and by what percentage they've been reduced. In the case of PDF files that are already optimized, we won't be able to compress them any further.

Uploading and processing

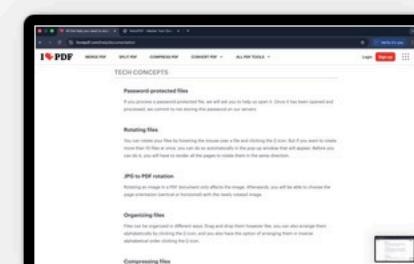

The uploading and processing time for files will depend on your Internet connection and on the size of the files you have selected. If the browser closes while your files are being processed, you can verify their processing status in the 'My Account' menu, in the 'Last files processed' section.

Downloading

The output files will be deleted from our servers after a period of time, depending on your user type. You can also save it straight back to the cloud, on your [Google Drive or Dropbox](#) accounts. You can cancel the validity of the download link whenever you want.

Working from the cloud

You don't need to have the files you want to process stored on your [device](#). If you have a [Google Drive or](#)

MERGE PDF

Working from the cloud

You don't need to have the files you want to process stored on your [device](#). If you have a [Google Drive](#) or [Dropbox](#) Account, you can download them straight to our page. Once your files have been processed, you can save them back to the cloud. To process cloud-stored files, you'll need to enter the password of your cloud account the first time you use this feature. Your passwords won't be stored in our system. This is feature is especially useful when working from a mobile [device](#) or tablet.

Select files to upload

To select files from your computer, you can do it by hitting on the 'Select images' button. If you want to select more than one file at the same time, hold the 'Ctrl' key while clicking on the files. If the files are in consecutive order, click on the first and the last, while holding on the 'Shift' key. You can also drag and drop them straight to our canvas.

Minimum requirements

We recommend using our tools from the following browsers: Chrome, Firefox, Explorer +10 and Safari. When working from Explorer version 8 and 9, the rendering option for document pages will be disabled. iLovePDF needs to work with Javascript enabled.

Technical issues

This new version of iLovePDF has been designed to be much easier to work with, and we have tried to tackle any technical issue. However, if you ever face any problem, do not hesitate to reach out. If the file does not contain confidential material, attach it to your e-mail so we can solve the problem faster. We will
